

ERA 3.2.0 TO ERA 3.2.1 UPDATE INSTRUCTIONS

UPDATE

1. Stop using ERA devices before the update is complete:
 - Unmount the file systems from all ERA RAIDs:
2. Unpack the archive with the ERA 3.2.1 distribution for your OS (*raidix_era-3.2.1.*.tar.gz*) and go to the corresponding directory:

```
# umount /dev/era_<raid_name>
```

- Stop other applications that are using ERA RAIDs.

```
# tar xzf <archive_name>
```

```
# cd raidix_era
```

3. Run the installation script *installer.sh* located in the archive with program packages:

```
# ./installer.sh
```

4. Reboot the system.
5. After the reboot, you can resume using the devices.

UPDATE CHECK

To ensure the packages were updated successfully, run

```
# eraraid show
```
