

RAIDIX Storage for Milestone XProtect

RAIDIX Video Storage reveals all advantages of Milestone XProtect® open platform, making all additional integrations work seamlessly in every specific environment. Working together, Milestone XProtect® and RAIDIX Video Storage deliver video surveillance installation with less CapEx, as you will need less drives, commutations and additional server platforms.

Key Features

- For the thousands of hi-res cameras
- Cost-effectiveness for large-scale projects
- Irreducible writing speed
- Nondisruptive video archive access
- All benefits of advanced analytical software
- Future proof scalability

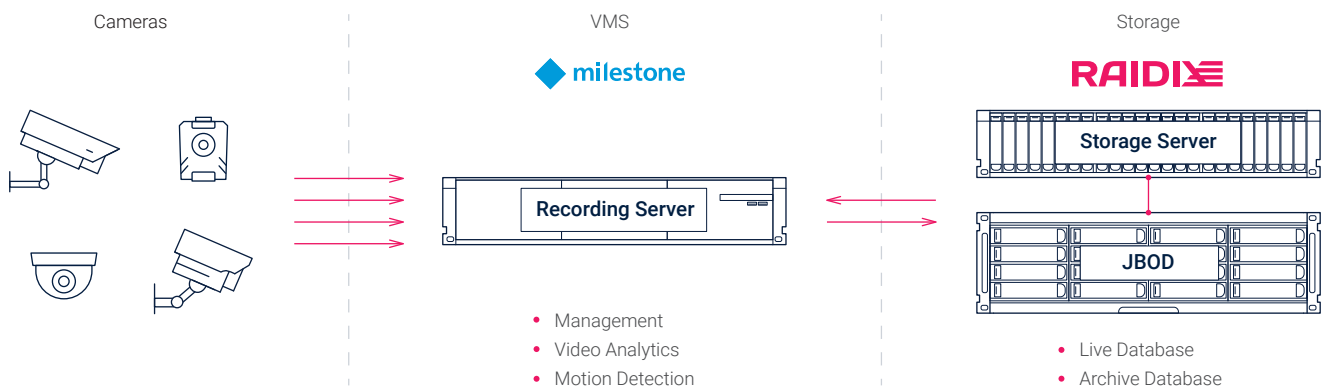

Milestone XProtect

Milestone XProtect® is a global market leading Video Management Software (VMS) that brings the puzzle pieces of a video surveillance installation together in a perfect combination to create a solution that keeps people, premises and property safe today – and tomorrow.

With XProtect as the foundation of your video surveillance, you get the freedom to build the entire system just the way you like it. Built on an open platform architecture you can customize your surveillance system and integrate other business applications into it for increased usability and performance.

RAIDIX Storage for Video Surveillance

To protect integrity of your data and avoid video frame losses, RAIDIX storage provides stable and irreducible writing speed even in case of hardware failures or during peak activities of the video management system.

Advanced software capabilities of the RAIDIX storage allows you to deploy storage for the large-scale surveillance systems with minimum costs for network and server infrastructure.

Solution Benefits

Reduce storage overhead with the archive volume growth

Innovative RAID technologies give you lower redundancy of the drives and hardware platform according to your archive volume growth.

Steady work with the thousands of hi-res cameras

RAIDIX engine performance rate is able to connect the thousands of high resolution cameras to a single system, working with the parallel streams from the dozens of video servers.

Ready for the worst-case scenario

When faced a drive or hardware failures, RAIDIX-based storage delivers high bandwidth needed for zero frame loss in the peak load. Even in this case, you'll still have enough reserved performance to be sure in your infrastructure resiliency.

All benefits of advanced analytical software

RAIDIX storage performance is very enough for smooth and responsive work of advanced analytical software. It delivers you all benefits of the top notch VMS products with face recognition and motion detection features.

About Milestone Systems

Milestone Systems is a leading provider of open platform video management software; technology that helps the world see how to ensure safety, protect assets and increase business efficiency. Milestone enables an open platform community that drives collaboration and innovation in the development and use of network video technology, with reliable and scalable solutions that are proven in more than 150,000 sites worldwide. Founded in 1998, Milestone is a stand-alone company in the Canon Group.

RAIDIX

RAIDIX is an innovative software company developing professional storage solutions. We creates products for storage environments where applications and services demand high speed access and operate with massive data volumes.
